BMW E36 MODEL OUTSIDE BELT MOUNT KIT MOUNT

This kit has been designed to provide a mounting point for off road snap-in mount lap belts using the factory mounting location and hardware. **Note:** This product is designed for drivers ed use.

Step 1.

Carefully pry off plastic escutcheon to expose the outside lap belt mounting bolt located along the doorsill.

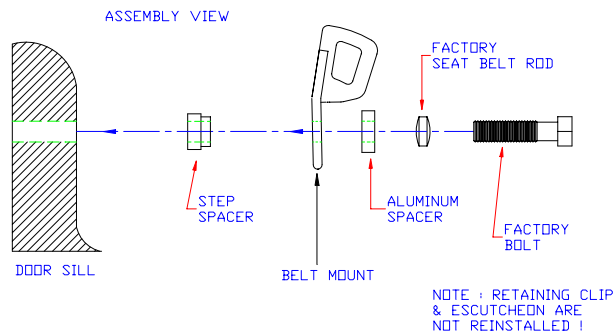

Step 2.

Remove bolt clip and spacer.

Step 3.

Position supplied spacer, belt mounting bracket and aluminum spacer as shown below. Reinstall factory bolt.

Note: Make sure that the bolt threads into the body a depth equal to at least 1 diameter of the bolt. If not, recheck installation.

Step 4.

Check for proper operation of the factory seat belt. (The BK belt mount can be rotated out of the way when not in use.)

Finished installation shown below:

Performance driving events are by nature potentially hazardous to your health. Brey-Krause Mfg. Co. Inc. shall not be liable for injury, consequential, or other types of damages resulting from the use or misuse of our products. Proper installation of these parts is critical and should only be done by a professional shop.
