

- R-9226 Driver e46/e85/e86 manual slider release handle
- R-9227 Passenger e46/e85/e86 manual slider release handle

### **INSTALLATION INSTRUCTIONS: SLIDER RELEASE HANDLE FOR FACTORY E46/E85/E86 MANUAL SLIDERS**

The e46/e85/e86 manual sliders have their release handle built into the factory seat. This becomes unusable when an aftermarket seat is installed. The R-9226/7 slider release handle is designed to replace the factory handle when the R-9220/1/2/3 side mounts are used.

The R-9226/7 slider release handle is designed to come through the opening on the outboard seat mount as shown. Position the handle between the two sliders, reusing the white factory plastic inserts in the sliders. If the grease in your white plastic slider inserts has dried out or disappeared, replace.

The top of the slider release fingers should be on top of the slider release latch. Use the included springs to maintain contact between finger and mechanism, as well as eliminate vibration. Springs should be used on both fingers.

Performance driving events are by nature potentially hazardous to your health. Brey~Krause Mfg. Co. Inc. shall not be liable for injury, consequential, or other types of damages resulting from the use or misuse of our products. Proper installation of these parts is critical and should only be done by a professional shop.
